## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson et al.

Dawson discloses a method of inhibiting water production while allowing hydrocarbon production. An emulsion is injected into the well that forms a first physical barrier. Water reacts with the emulsion causing cross-linking which forms a chemical stabilized structure. The produced hydrocarbons do not react with the emulsion. The hydrocarbons are then seen to dissolve the physical structure. As to claim 5, polymers may be used in the emulsion.

### ***Allowable Subject Matter***

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P Neuder whose telephone number is 703-308-2150. The examiner can normally be reached on Tuesday through Friday.
